

Say Goodbye to Spreadsheets and a Cluttered Inbox.

Managing objectives in 15Five aligns everyone around the highest leverage activities, all in one place.

KEEP YOUR TEAM FOCUSED, ENGAGED, AND ALIGNED

15Five and *Objectives* (OKRs) perfectly complement each other to provide context around objective-focused management. Blending *Objectives* into our weekly feedback practice, managers obtain deeper insight into the motivations, distractions and other issues that influence or hinder results.

1 Company Alignment

Using the OKR goal-setting process, you can create individual, department, and company-wide objectives.

2 Greater Visibility

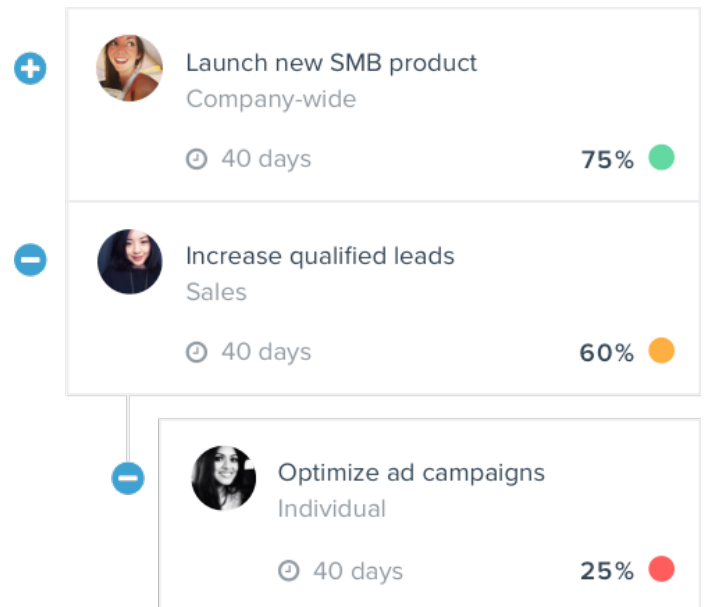

Share progress updates inside your 15Five report, by quickly setting the status of the objective each week (on track, behind, or at risk).

3 Increased Accountability

Objectives are fully transparent and lets everyone in the organization know how their collective efforts propel the company forward.

4 Measurable Results

Filter, drill-down, and export detailed insights on objectives, such as who owns the initiative, status, the timeframe for completion, and manager feedback.

15Five Objectives is available on the Plus and Pro plans.
